Radha Kishan Sharma

Power Platform Developer

Profile Summary

A results-driven Microsoft Power Platform Developer with expertise in Power Apps, Power Automate, Power BI, and SharePoint. I specialize in creating custom applications and workflows that enhance business efficiency and productivity. Skilled in translating business requirements into technical solutions, I develop user-centric applications that meet complex needs. By integrating AI and Copilot technologies, I deliver intelligent, automated solutions that are modern and effective. Committed to continuous improvement and operational excellence, I stay updated with the latest advancements in AI, Copilot, and the Power Platform.

Projects

- **AI-Powered Document Processing Agent:** Automated document processing using **AI Builder and Copilot Agents** to extract key data, validate via **AI Agenting workflow**, and store results in SharePoint lists—reducing manual effort by 70% and achieving **100% data accuracy**.
- **Recruitment Model-Driven App:** Designed a Dataverse-backed Model-driven application to manage the end-to-end recruitment lifecycle, including candidate tracking, interview scheduling, and onboarding automation, improving efficiency and reducing manual coordination.
- **Code Blue Debrief App:** Developed a healthcare-focused app to capture and analyze emergency response debriefs, ensuring compliance, accountability, and continuous improvement in patient care.
- **PAR Audit Mobile Application:** Designed a mobile-first auditing app to record, track, and resolve **PAR (Physical Asset Review) audit findings** in real time, streamlining compliance checks and reducing reporting delays by 60%.
- **Project Management Tracker:** Built a centralized tracker in Power Apps integrated with Power Automate to manage tasks, milestones, and approvals, improving project visibility and on-time delivery.
- **Work Activity Management Tracker (WAM):** Created a stopwatch-based app with real-time dashboards; improved productivity monitoring across teams.
- **Demand & Vendor Management:** Delivered an end-to-end app to track and automate service requests, improving service visibility.
- **Vacation Tracker:** Designed a PTO request app with automated approval workflows, reducing email overhead by 80%.
- **Ops KPI Tracker:** Managed Ops KPIs and tracked users' work activity, shifts, and daily adherence.
- **Branch Feedback App:** Built a centralized system to manage internal feedback and reporting, increasing response time efficiency.
